

# Unlock the power of the group

## Re-imagine the way people work together

While we have great tools for individuals, the tools and technology available for groups have not evolved to address the needs of the modern workplace.

### *The Microsoft Surface Hub is the first of its kind*

It integrates the best of Microsoft hardware, software, and productivity services in a single package. Designed for the modern workplace, it integrates seamlessly with your Microsoft platforms, to transform group productivity and enhance collaboration.

### Makes meetings more engaging and productive

- Improves experience for remote and in-room users
- Great experience on wireless and wired
- Share and annotate content
- Walk away with confidence when the session is over

### The best digital tools to create and brainstorm

- More powerful than a traditional whiteboard
- Up to 3 people can write simultaneously
- Natural, responsive pen - feels just like a pen on paper
- When you're done, take your ideas with you

### Amazing large-screen apps

- Powered by Windows 10
- Run any Windows 10 App natively from Surface Hub
- Share any Windows application
- Comes with Microsoft applications like Skype for Business, OneNote, PowerPoint, Word and Excel

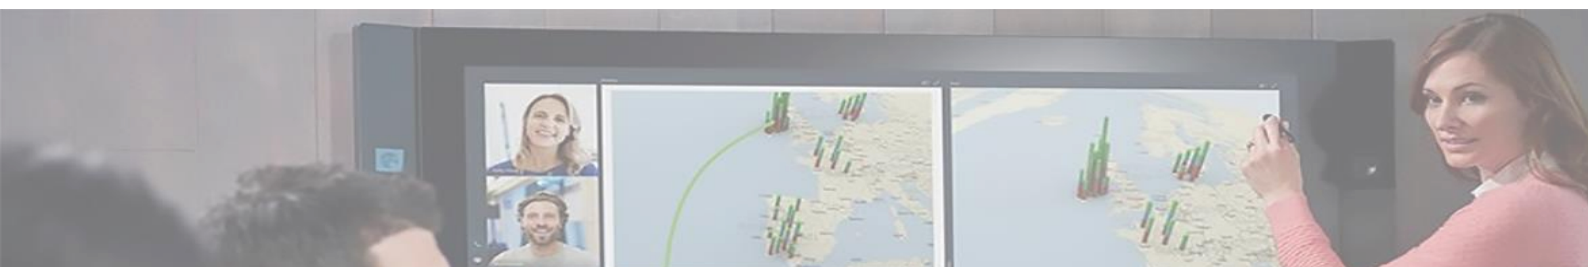

### Integrates beautifully into the modern workplace

- Turns any room into a collaboration space
- Walk-up and communal design means anyone can use - no login required
- Designed to scale with the enterprise
- Integrates with existing conference room infrastructure

### Why Ensyst?

An authorised reseller of Microsoft Surface Hub, Ensyst also has the skills and expertise to help you make the most of the Microsoft Surface Hub in your organisation.

We help customers embrace the modern workplace and empower user productivity with integrated communications, mobility, and collaboration technologies. We plan, design, deploy and support architectures to deliver a unified communication and collaboration experience, tailored to the needs of customers.
